Dear *Dr lumba*,

Reviewers have now commented on your paper. You will see that they are advising that you revise your manuscript. If you are prepared to undertake the work required, I would be pleased to reconsider my decision.

For your guidance, reviewers' comments are appended below.

If you decide to revise the work, please submit a list of changes or a rebuttal against each point which is being raised when you submit the revised manuscript. All changes are made in red fonts.

Your revision is due by 2021-09-30 23:59:59.

To submit a revision, go to <https://www.editorialmanager.com/sujst/> and log in as an Author. You will see a menu item call Submission Needing Revision. You will find your submission record there.

Yours sincerely

Peerapong Uthansakul, PhD
Editor
Suranaree Journal of Science and Technology

Comments from the Editor and Reviewers :

Reviewer 1: The purpose of this study aims to explore the impact of the COVID-19 pandemic. That is very interesting. The work is supported by a relevant analysis of the literature. However, I think that readers can understand easier if authors summarize the previous researches and/or suggestions of the impacts and countermeasures with the table format.

Reviewer 2: The paper is interesting since the authors tried to reveal the effect of COVID-19 on transportation system in Indonesia. Even though there is no data analysis in this manuscript, but there are a number of past researches reviewed. The countermeasures have been introduced in order to prevent the spread of COVID-19 in public transport. A clear and concise conclusion is presented in this paper. The reviewer agrees that the manuscript is suitable for the SUT Journal. Thus, the acceptance of this paper is recommended.

TITLE: IMPACT OF COVID-19 ON PUBLIC TRANSPORT IN INDONESIA

Comment of reviewer 1

The purpose of this study aims to explore the impact of the COVID-19 pandemic. That is very interesting. The work is supported by a relevant analysis of the literature. However, I think that readers can understand easier if authors summarize the previous researches and/or suggestions of the impacts and countermeasures with the table format.

Revision in section **Results and Discussion** in last paragraph

A summary of previous research related to the impact of COVID-19 and Countermeasures on public transport, as shown in Table 1 below.

Table 1. Summary of the impact COVID-19 and Countermeasures on public transport

Number	Impact of COVID-19 pandemic	Countermeasures on public transport
1	The COVID-19 pandemic has resulted in a decreasing in the number of public transport passengers	<ol style="list-style-type: none">1. There is a need for regulations related to the application of health protocols in public transportat such as: the use of masks, the provision of hand sanitizers in public transport, measuring body temperature and having a negative Covid-19 certificate2. The sale of public transport tickets uses an online system to decrease contact among public transport passengers3. There is a need for regulations relating to the application of transportation services that lead to a digitalized system in reducing the contact between passengers.4. There is a need for regulations relating to difference the price of tickets during peak hours and not peak hours in an effort to decrease contact among public transport passengers5. Long-term planning of public transportat needs to consider of changes in people's lifestyles during the pandemic, such as the use of the car tend to increase, changes from the use of physical space to the use of virtual space6. Design of Transport policy needs to consider the balance between social, environmental and economic dimensions7. It is necessary to create bicycle lanes and pedestrian paths in an effort to avoid the spread of COVID-19
2	The COVID-19 pandemic has resulted in a decreasing in trips, both in terms of duration and distance	
3	Public transportation cannot carry out its service functions during this COVID-19 Pandemic	
4	The users of Public transport who are dependent on public transport and do not have private vehicle are very affected during pandemic	
5	The use of private vehicles and bicycles has increased, including walking during the COVID-19 pandemic	
6	The COVID-19 pandemic has had an impact on changes in driving behavior, such as increasing speed, increasing the use of cell phones while driving	
7	The COVID-19 pandemic has resulted in a decreasing in traffic violations, a decreasing in the occurrence of accidents, and a decreasing in traffic volume	
8	The improving air quality during the COVID-19 pandemic	

Comment of reviewer 2

The paper is interesting since the authors tried to reveal the effect of COVID-19 on transportation system in Indonesia. Even though there is no data analysis in this manuscript, but there are a number of past researches reviewed. The countermeasures have been introduced in order to prevent the spread of COVID-19 in public transport. A clear and concise conclusion is presented in this paper. The reviewer agrees that the manuscript is suitable for the SUT Journal. Thus, the acceptance of this paper is recommended
