

CHAPTER I

INTRODUCTION

A. Background of the Research

The speedy increase of technology added many changes in diverse components, one in every of them being within the field of education. It gave rise to many kinds of social networking access that offer convenience in communicate with each other. With this improvement, social media additionally affords many blessings, which many humans use. in line with Aprilia et al. (2019:221), The speedy technological trends of modern globalization give many advantages in progress in lots of elements, one among them being ease of verbal exchange. Many social media are effective mastering media to facilitate gaining knowledge of and coaching. As talked about through Gupta and Bashir (2018), there have been four primary purposes for using social media packages, which can be enjoyment, socialization, statistics, and schooling.

in line with Sekeon et al. (2022), social media is one of the most influential media for representing one's emotions. trendy most used social media are YouTube, Twitter, Instagram, and Whatsapp. Many college students in developed nations already use social media for getting to know. Make students' less complicated to examine, specially in English, and their additional grammar, essay, and show subjects (Bermudez et al., 2016).

in step with Ratri (2018:20), give an explanation for in his research that social media terms seek advice from a variety of offerings based totally on the net and cell which permit the user if you want to be a part of the web conversation, contribute to the content created via the user, or be a part of

within the on-line network. So social media have an vital rule that students can use.

An global language, English have become a language that everyone need to have the ability to speak. additionally, in Indonesia, it may be visible that English has grow to be a topic in junior and senior high college in Indonesia. it's miles supported by using Mahmudah (2017), mentioning that during our u . s . a ., Indonesia, English is the primary foreign language, and it's far used as a subject in faculty. it is taught from the lowest grade, like standard faculty, till the best degree, like senior high college and college.

To train English to younger students, a trainer should provide exciting techniques it makes the students revel in the getting to know manner. the students need a mobile software which could make it less complicated for college students to study English. The application must be able to attract the student's attention, and students can use the application for entertainment as well as learning. One of them is *TikTok*. For many social media, young students still prefer to use *TikTok* Application. According to Bohang (2018), from 2018 to 2019, TikTok Application became the most social media downloaded by people in the world, which is 45,8 million times, beating the previous popular application such as Youtube, Facebook, and Instagram. However, it was launched in September 2016. Young students prefer exciting features, like music, short video duration, funny videos, etc. However, in this example, the researcher will awareness at the English viral music on TikTok, which help the scholars to analyze English vocabulary.

Listening to the song is the most enjoyable activity. English songs are a perfect way to learn English. Where students can listen to a song while studying

vocabulary, pronouns, grammar, and several other language skills through lyrics in the song. One way of coaching listening is through songs. Sevik (2012) songs are an excellent device for studying in which students have fun and loosen up at the same time as studying. Songs could make college students sense at ease while studying and now not sense bored. it could additionally form the premise for plenty lessons. it can be used for various English for foreign language studying and coaching sports. (Futonge, 2005), the use of songs in the classroom is a great way to stay up to listening sports. it is able to be added that a couple of steps had been used with achievement inside the method to make the listening activities greater effective.

primarily based on college students' habits made by means of the researcher all through the previous coaching assistance software on the SMKN 1 Rambah, the researcher determined that scholars at the college used the TikTok software and regularly listened to English songs on TikTok to growth college students' vocabulary.

As a result, primarily based on the preceding explanation, the researcher would really like to conduct research beneath the identify college students' belief in the direction of English Viral music on TikTok to mastering English Vocabulary at eleventh-grade students of SMK N 1 Rambah.

B. Setting of The Research

Based above, the eleventh-grade students' of SMK N 1 Rambah must use the social media *TikTok* application English viral songs on *TikTok* to learn English vocabulary. Therefore the researcher wants to analyze their Perception of English viral songs on *TikTok* to learn English vocabulary.

C. Limitations of The Research

studying Vocabulary is the important component to do while getting to know English. Vocabulary may be found out in many approaches, such as English songs at the TikTok software. In recent times, the existence of TikTok can help students enhance their vocabulary. Many content writers of TikTok make use of English songs as such video content material to make it less complicated for the viewer to study English vocabulary through track every time and anywhere videos will use. In this case, were the videos from @our.playlist, @cemara214_, @leststlearntogetherguys, @aeslyric. Those videos specify the English viral song like Que Serasera by Billiane, dandelion by Ruth B, Perfect by Ed Sheeran, why don't We by 8 Letters, and Give Me Yours Forever by Zack Tabudlo.

This research also concentrates on eleventh-grade students whom students have already used the TikTok application and often listen to

D. Formulation of The Research

This research formulated the research as the following question: What are students' perceptions toward English viral songs on *TikTok* on learning English vocabulary at eleventh-grade students of SMK N 1 Rambah?

E. Purpose of The Research

This research aims to analyze how the students perceive English viral songs on *TikTok* to learn English vocabulary.

F. Significance of The Research

1. The students can use the English viral song videos on *TikTok* for students learning vocabulary, which makes their learning more enjoyable, relaxing, and not dull.

2. The teacher can using *TikTok* as an alternative media for learning English vocabulary.
3. Moreover, this study can be a reference for the other researchers when researching a related topic.

G. The Definition of Key Terms

1. Student Perception

in step with Smith (2008), perception is an impact built when a gap and time period are felt. perception is an outer cognition of entities, scilicet the experience and whole vicinity at this time. It shows that notion courses a person's purpose or opinion towards a particular item. belief is people' ideas approximately something they believed became legitimate and understood them.

on this studies, students' perception method what college students experience approximately English viral songs, can TikTok Viral songs assist students examine English vocabulary.

2. Social Media

According to Barreto & Whitehair (2017), social media are net-based totally media in which users build and communicate news via digital societies and social webs. someone operates social media in their contact, sends and resends information, and makes and pronounces content material on line. Social media information document all statistics and people' manners. Social media is a web-based totally tool and platform that broaden and percentage data. it is able to be a share of words, photos, films, or others. on this research, social media means *TikTok* because, currently, *TikTok* is an application that students

widely use. TikTok applications provide video features, and TikTok can also design exciting and interactive learning media for students.

3. Learning through Song

Sevik (2012) says that songs are brilliant approach thru which students have fun and, on the identical time, accumulate language. Songs also can provide a relaxed lesson on a hot, dull day. it may additionally form the idea for many classes. it could be used for various English for overseas language gaining knowledge of and teaching activities.

in this studies getting to know via songs way English songs are most of the content or video history songs used by TikTok creator content material, so college students get used to paying attention to English songs every time students open the *TikTok* application and learn vocabulary from the songs students listen to.

4. Learning Vocabulary

in step with Kridalaksana (2009), vocabulary is a language thing that incorporates all the information approximately the which means and use of words in a language also says that vocabulary is the total range of words posed via a speaker, writer or a language learning vocabulary is an important element to do whilst a person sooner or later makes a decision to analyze English.

in line with Anova et al. (2015). speakme is a talent that students ought to be mastered. furthermore, the evidence that the scholars can do this is they are able to speak English and take the facts nicely. with the aid of speakme, a person can take data from other pe. it is able to share data with other human beings, and the scholar can spend their time in a nice thing, which includes

making a few communication, debating, and communicate; it may be a manner for them to get new statistics, growth their vocabulary, and improve their shape. It means the students must learn Vocabulary because Vocabulary is the most essential part of speaking.

In this research, learning vocabulary means the students can learn English Vocabulary and English viral songs on *TikTok* to increase and train students' vocabulary skills.

CHAPTER II

REVIEW OF THE RELATED THEORIES

A. Review of Related Theories

1. The Nature of Student Perception

According to Smith (2008), belief is some thing they catch the statistics for them, and something they sense will arise, however or whether or not it's miles real. moreover, Smith (2008) and Carr outline belief as an influence built whilst a niche and time period are felt. perception is an outer cognition of entities, scilicet the sense and entire area presently. in order that what the students note dispatches a message to their emotions that what they see inside the fact. in line with Smith (2011), college students' perception is know-how and the impression college students experience with the activity.

in keeping with Qiong (2017), notion is the system of accomplishing attention or know-how of sensory statistics in philosophy, psychology, and cognitive technology. The phrase "notion" comes from the Latin words perceptio and perception and way "receiving, collecting the movement of taking possession, and apprehension with the thoughts or senses. Gamlem & Smith (2013) says college students' notion is students understand comments. how the response to subject matter has been transferred through the learning process.

2. Process of Students' Perception

in line with Qiong (2017), there are three tiers of the perception procedure, as follows:

a. selection

choice is the primary level in the technique of notion. on this stage, the environmental stimulus turns into a significant enjoy.

b. organization

the second stage within the technique of belief is organization.

after you have information from the out of doors international, statistics wishes to be arranged in a sure manner via finding significant patterns. There are characteristics on this stage. First, the organizing process presents the shape of human perception. in this degree, raw stimuli from the outside world are positioned into significant reports of dependent people. second, the technique shows that human belief has student stability. In different phrases, the selected stimulus will become greater long lasting after deciding on a stimulus and putting it into a class.

c. Interpretation

The third stage in belief is Interpretatiwhich, which refers to attaching which means to what the stimulus chooses.

but, every body will interpret in a different way despite getting the identical stimulus.

d. notion

Psychologically, perception has to do with the following data. notion is the psychological capacity to procedure or use statistics from experience organs. according to Akande (2009), who later quoted the Alagbu statement, notion follows elements, along with past experiences, gift reviews, character, and motivation, as vital to knowledge how humans perceive activities. From the above definition, it is able to be concluded that a scholar's perception is

psychological to manner and analyze an occasion that has been executed or has came about.

3. Forms of Students Perceptions

according to Irwanto, as stated in Damayanti (2020), after the character interacts with the items, the perception can be visible in kinds of perception that are each nice and terrible.

a. fantastic perceptions

it's miles a belief proven in all of the expertise (whether or now not it's far recognised), and the responses are accompanied through efforts to utilize it. The announcement of students can say tremendous perceptions if college students pick 'Strongly Agree' and 'Agree' at the questionnaire.

b. terrible perceptions

it's far the perception of view of an item and refers to circumstances in which the difficulty perceives the item captured and has a tendency to reject it because it does no longer correspond to his non-public. belief describes all knowledge (whether or not or not he knows it) and responses that aren't in step with the object being perceived. The announcement of college students can say terrible perceptions, and college students choose 'Disagree' and 'Strongly Disagree' on a questionnaire.

Based on the statement above, the researcher will use questionnaires and interviews as instruments for data collection by using indicators for perception questions.

4. The Nature of Social Media

in line with Davis III, Deil-Amen, Rios-Aguilar, and González Canché (2012), referred to in Tharinee Kamnoetsin (2014), define social media era (SMT) as

internet-based totally and mobile applications that permit people and groups to create, engage, and share ideas or current content material in various styles of communications in virtual environments. So, social media are the online communities that construct interaction amongst people with each different and percentage know-how and records. hence, the user of social media can create and organize a profile for themselves, comment, and proportion ideas.

consistent with Alassiri et al. (2014), social networking web sites or social media offer an interactive platform permitting users to speak with other contributors, establish social relations, and proportion information and expertise relative to person revel in sports in actual lifestyles. Social media are styles of electronic conversation facilitating interplay based totally on particular hobbies. Social media consist of internet and cell technology. Kaplan and Haenlein (2010, p. 61) define social media as "a set of internet-based packages that build at the ideological and technological foundations of internet 2.zero and allow the advent and alternate of person-generated content material."

similarly, social media additionally consult with social software in the shape of websites and other online communities, such as social networking and micro-blogging created by a big institution of people (called users) to percentage statistics, ideas, personal messages, conversations, or to increase social and professional contacts.

five. The styles of Social Media

The styles of social media are developing and increasingly more various. Social media has many sorts in step with their makes use of. there are many types of social media. Kaplan & Haenlein (2010), says diagnosed six extraordinary kinds of social media, that are (a) Collaborative tasks, (b) blogs and micro-

blogs, (c) content communities, (d) social networking websites, (e) virtual video games worlds, and (f) virtual social worlds.

a. the primary is collaborative tasks. Wikipedia is probably the maximum common sort of collaborative task site. Wikipedia lets in several humans to create media content collaboratively for collaborative initiatives.

b. the second one is blogs and microblogs, taken into consideration the earliest shape of social media web sites. Blogs usually show date-stamped entries in opposite chronological order and are normally controlled by way of one character best, however offer the opportunity of interaction with others via the addition of comments., Date-stamped entries in reverse chronological order may be observed on blogs and microblogs like Twitter.

c. The 1/3 is content communities, the primary position of content material communities is to allow users to percentage content material together with films, pics, and audio. net customers can register for every content material groups, put up media content material to the websites, and proportion media content material. one of the content material groups is YouTube, which permits many people to proportion media content.

d. The fourth is social networking. The web page apps allow the customers to build user profiles, invite others to sign up for the web page, get entry to different users' profiles, percentage data inclusive of textual content, photos, movies, and other links from different web sites, and ship instant messages to one another. users of social networking web sites like fb can create non-public profiles and hook up with buddies and co-workers by granting them get entry to on your web page.

- e. The 5th is the digital gaming international. on this type, as an example, global of Warcraft is a subset of digital worlds which can be modeled web environments wherein users can have interaction with every different and impose clear regulations on their players within the context of the game world.
- f. The final is virtual social worlds. in this type, users are allowed to modify their avatars, their behaviors, their lives, and their acts of their digital lives which might be much like their real lives. as an example, second life allows customers, known as "residents," to engage greater freely and effectively stay their digital one as an extension in their actual life.

5. Learning Through Social Media Tik Tok

According to Yang (2020). The *TikTok* application is a social media platform from China and turned into published in September 2016. packages deliver get right of entry to to social media customers to create song motion pictures of short length. TikTok media users in Indonesia presently have about 15 million perspectives and beat users of the Instagram and fb applications. most customers of this TikTok utility are Millennials, teenagers, and adults.

TikTok has become a fave utility around the arena in recent times. it is much like Bohang (2018). Who says that from 2018 to 2019, TikTok utility became the most social media downloaded by way of people international, specifically in the age variety of beneath 20. As a famous social media utility today, TikTok additionally can be designed as an exciting and interactive studying media for college kids. except, numerous functions furnished diverse content, which include leisure, track, motivation, comedy, horror, and training.

based on the assertion above, it could be concluded that TikTok is a social media application that students widely use to learn Vocabulary through English songs that pass through the *TikTok* homepage.

6. The Nature of Song

According to Hapizah (2009:21), songs can enter our brains. They go to a exceptional a part of the mind and often sink deeply into extraordinary or published things. It approach whilst human beings concentrate to the track, they can experience the artwork of the track that comes to their mind. at the same time as Greenough in Ulfa (2006) explains that track approach the act of Hornby (1993:133) says that music is an area of tune with phrase that song. From the explanation above, we are able to conclude the tune consists of lyrics, acts, artwork, and song that make a awesome track for listened and this can be used in studying grammar.

similarly, Ratnasari in Hashemian (2014) explains that songs are paintings intended to be sung with or without instrumental accompaniments. The loose Encyclopedia (2013) defines a song as a piece of tune for observed or unaccompanied voices or voices. Nursery rhymes are quick and straightforward rhyming verses, songs, or tales generally designed, informed, or sung for little children (Danielson, 2000). A song is an exquisite form of listening enter for a wide variety of comprehension tasks because they are commonly brief and, in preferred, use simple natural language, and comprise repetitions (Goh.2000:44).

therefore Grenouh in Ulfa (2006) stated that tune has a few cause in coaching enjoyable. It method being attentive to a tune, and students can also look at grammar and vocabulary due to the fact

based on the reason above, the scholars can easily recollect the word they pay attention as a new vocabulary because there may be any repetition, and it makes the scholars involved to understand the entire of the tune.

7. The Nature of Vocabulary

Vocabulary is one of the materials utilized by college students of all college stages in Indonesia. Vocabulary is one of the 4 language components: spelling, grammar, phonology, and vocabulary. And essential factors can not be separated from each different inside the language-studying procedure due to the fact English is a foreign language. Vocabulary aims at expanding and enriching the scholar's understanding of words to improve their reading, listening, speaking, and writing.

in line with Kridalaksana (2009). "Vocabulary is language thing which incorporates all the records approximately the meaning and using of words in a language and is likewise say that vocabulary is the full variety of phrases posed by way of speaker, creator or a language." Penny (2007) said that vocabulary can be defined roughly as words we educate in foreign languages.

The definition of vocabulary is clear enough that they use a set of words in most cases of human lifestyles. the use of words itself is differentiated in step with the sphere, man or woman, class, or profession. It way that the beggar uses phrases to ask for cash from wealthy human beings, and the teacher makes use of a fixed of words whilst their scholar instructions. The researcher believes that vocabulary is one issue of language this is essential in gaining knowledge of a language because vocabulary includes a meaning used in communication.

8. The Types of Vocabulary

primarily based on information from Judy. okay Sir Bernard Law's ebook: The Bridge of Vocabulary (2007), there are four varieties of vocabulary they are :

1. Listening Vocabulary

The words we listen and recognize. within the womb, fetuses can come across sounds as early as sixteen weeks. furthermore, toddlers are listening in the course of all their waking hours – and we maintain to learn new words this way all our lives. by the time we reach maturity, maximum folks will recognize and apprehend close to 50.000 words. (Stahl, 1999; Tompkins, 2005) youngsters who're completely deaf do not get exposed to studying vocabulary. as an alternative, if they have signing fashions at domestic or faculty, they may be exposed to a "visible" listening vocabulary. the quantity of phrases modelled is plenty less than a listening to toddler's incidental listening vocabulary.

2. talking vocabulary

The words we use whilst talking vocabulary is relatively restricted: maximum adults use five.000 to 10.000 phrases for all their conversations and education. This variety is a great deal less than our listening, maximum likely because of ease of use.

3. reading vocabulary

The words we understand when we examine textual content. we can study and understand many phrases we do not use in our vocabulary. this is the second most tremendous vocabulary in case you are a reader. You cannot "grow" your vocabulary if you aren't a reader.

4. Writing Vocabulary

The words we are able to retrieve whilst we write to express ourselves. We usually locate it less complicated to give an explanation for ourselves orally, the usage of facial features and intonation to assist get ideas throughout, than to locate the right phrases to talk the equal thoughts in writing. Our writing vocabulary is strongly prompted via the words we can spell.

9. Learning Vocabulary Through English Viral Songs on *TikTok*.

Gaining knowledge of Vocabulary is the vital thing to do while a person in the end comes to a decision to examine English. Vocabulary is one of the materials utilized by college students of all faculty levels in Indonesia. Vocabulary contains 4 language components: spelling, grammar, phonology, and vocabulary. It's far an important detail that can't be separated from every other in language learning considering the fact that English is a foreign language.

Paying attention to English songs felt more exciting than the opposite sports. English songs are a brilliant language package deal that bundles way of life, vocabulary, listening, grammar, and other language abilities in only a few rhymes. One manner of teaching listening is through songs. Sevik (2012) says that songs are tremendous means via which children have amusing and simultaneously collect language. Songs also can offer a relaxed lesson on a hot, stupid day. It may also form the idea for plenty classes. It can be used for diverse English for overseas language learning and coaching activities. The usage of songs in the school room is an extremely good manner to live up to learning sports. It may be added that a couple of them have been used efficaciously to make the listening activities more effective.

Learning English vocabulary through English songs on *TikTok* can be an alternative medium for learning. *TikTok* become the fastest-growing platform in the world. Young students prefer exciting features, like music, short duration, and funny videos. Many content creators on *TikTok* use English songs as content or background sound of their content, to more accessible for the viewer to study English whenever and wherever. one of the reasons students use English songs on TikTok is to research English Vocabulary, is due to the fact most of these songs are often seen and listened to by most of the students. It method that the students are trained enough to expect the vocabularies that encompass the lyrics of these songs.

B. Review of Related Finding

some studies are relevant to the studies that the researcher conducts. the primary associated studies became carried out with the aid of Aprilian et al. (2019:221). in this studies, the speedy technological tendencies of ultra-modern globalization supply many blessings, including ease of communication. Many social media are powerful learning media to facilitate the learning and coaching. As mentioned by using Gupta and Bashir, there have been 4 primary functions for usingal media packages: ent: enjoyment

the second one related studies is some other take a look at displaying that making use of Tik-Tok motion pictures to educate English can substantially effect vocabulary know-how (Sinta, 2022). according to Fahdin (2021), brief films on TikTok contaish cloth assist them expand their English Vocabulary. Studenshow high quality feedback from the usage of TikTok as their language learning medusinge English content material movies are clean to apprehend and memorize diverse vocabularies they determined on thos

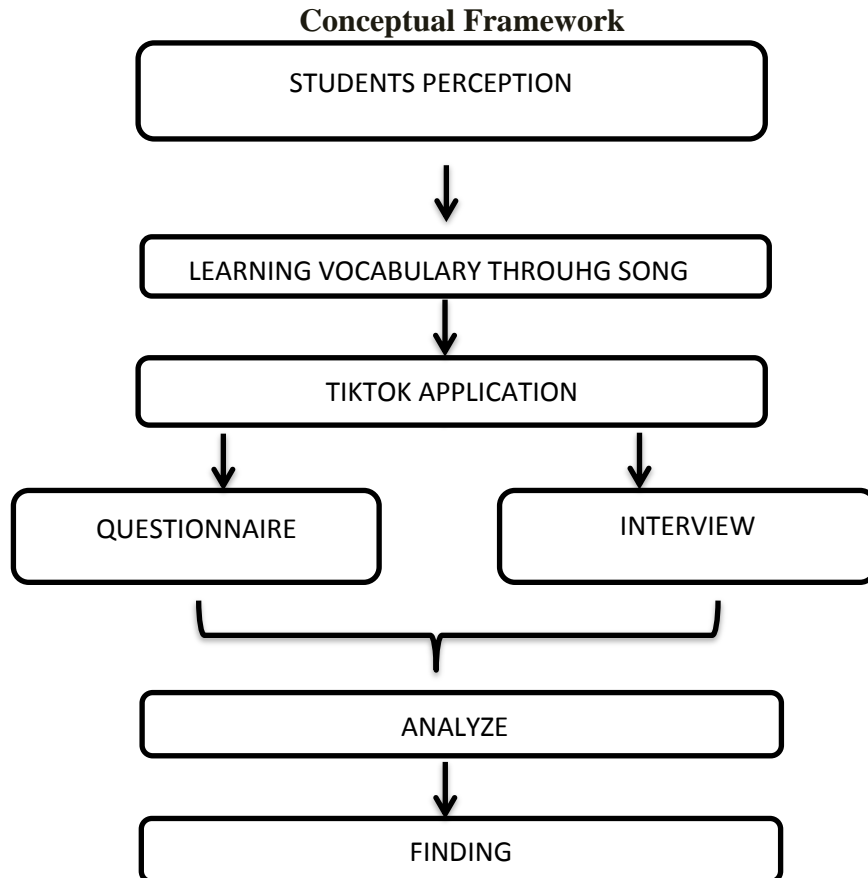

The last associated is research by Ratri (2018:20), who explains in his research that social media phrases confer with a diffusion of offerings based totally at the net and cell which permit the consumer capable of be a part of the net communication, make contributions to the content created by the consumer, or be part of in with the web community social media have an critical rule that students can use as a medium for learning, in particular in mastering English vocabulary.

additionally, special research has previously at the scholar's view of Tiktok as a device for English mastering (Yang, 2020). The findings indicate that scholars have an exceptional attitud implementing Tiktok as an educational layout in EFL training so they can use it as a medium for schooling oide of the classroom.

based on the preceding research above, the researcher concludes that there is a similarity between the studies above and this stch research above talks about social media helping studenlearnlsh and the research was also centered on finding the students' Perception of ofhe other hand, the differences between this research and the other studies are that that this research focusesanalyzing how studstudents perceive.

C. Conceptual Frame Work

Figure 2.1

The researcher made a concept for the research. The conceptual framework above, provide a short clarification of the define of the research. the first step in collecting the statistics for this studies is for the researcher to make sure that the students who might be studied use the TikTok utility and are by following in under studies goals. on this studies, the researcher will deliver a questionnaire and conduct interviews with students the researcher will summarize the data obtained, analyze how the students perceive English songs on *TikTok* to learn vocabulary.

CHAPTER III

RESEARCH METHODOLOGY

A. Research Design

This research layout will use a descriptive qualitative because the reason of this studies is most effective to know How is students' Perceptions of English Viral Songs on TikTok to examine English Vocabulary at 11th-grade college students SMK N 1 Rambah.

Widoyoko (2012:2) says that qualitative research describes how things are primarily based on information and said in statements or phrases. Qualitative descriptive have a look at is a part of qualitative research, the reason of qualitative research is to discover the end result of the evaluation of what the researcher desires to study.

B. Setting of The Research

The setting of this research was conducted by the eleventh-grade students' of SMK N 1 Rambah

C. Subject of The Research

The subject of this study is eleventh-grade students' of SMK N 1 Rambah, With a total sample of 34 students, the researcher chose this school because are users of the *TikTok* application and often use English songs on *TikTok* to learn vocabulary.

D. Instrument of The Research

in this examine, the researcher would use a questionnaire and interview as an tool to collect the statistics.

1. Questionnaire

according to Siniscalco & Auriat, (2005) Following are the 2 sections of the questionnaires: participants were required to refill non-public statistics within the first section, such as name, gender, class, and date.

in this research, students solution the questions within the questionnaire that consist of sixteen questions about college students' belief of English songs on TikTok to gaining knowledge of English vocabulary. in step with gay (1981:432) stated, the likerd scale is an instrument that asks an man or woman to reply to a assertion with the aid of four warning signs strongly agreed (SA), agree (A), disagree(D), and strongly disagree (SD). the following are the indicator of a questionnaire.

Table 3.1

Score Item Positive and Negative answer

No	Alternative	Answer	Score	
	Caption	Option	(+)	(-)
1	Strongly agree	SA	4	1
2	Agree	A	3	2
3	Disagree	D	2	3
4	Strongly disagree	DS	1	4

The Likert scale questionnaire part contains 10 items from three sub-indicators. According to Walgito (2010:m102-104), Perception has the following indicators:

Table 3.2

Latticework Research Questionnaire

Variable	Indicator	No. items	P+	P-
Students' Perceptions	Absorption	1-7	1,3,5,7	2,4,6

Toward English Viral Songs on TikTok to Learn Vocabulary	Understanding	8-14	9,11,13	8,10,12,14
	Evaluation	15-20	15,17,19	16,18,20

a) Absorption of the stimuli or item from outdoor the individual.

Stimuli or gadgets are acquired and absorbed by way of the 5 senses separately, now not collectively. The end result of the Absorption by means of the five senses will provide an picture, response, or influence inside the mind.

b) knowledge of the object.

After the image takes place inside the mind, the picture is prepared, categorised, and interpreted so that knowledge or understanding of an item is fashioned.

c) individual assessment or assessment of the item.

After information is shaped or know-how, an assessment of the person is shaped. individuals evaluate newly obtained knowledge with criteria or norms subjectively owned through the individual rat, eventhe item is the equal. therefore belief is individualInterview

The interview is used to know more about students" perceptions and to support the questionnaire's answer. According to Harding (2013), interview provides an opportunity for the researcher to listen to the views or experiences of the respondents for a while and to ask investigative questions to explore more ideas.

In this research, the researcher use telephone interviews. According to Romly and Syamsul (2006) in "Jurnalistik Terapan, Pedoman Kewartawanan dan Kepenulisan" there were 11 types of interview: 1) News-peg interview, 2) Funnel interview, 3) Inverted funnel interview, 4) Exclusive

interview, 5) Personal interview, 6) News interview, 7) Man in the street interview, 8) Casual interview, 9) Telephone interview, 10) Written interview, 11) Discussion interview

In this research, the researcher chose telephone interview, which utilizes interviews conducted by telephone with students. The researcher conducted interviews by distributing question sheets to be answered by students. The interview has 5 questions and conducted interviews with 34 students. The following are interview questions:

1. What do you think about English viral songs on *TikTok*, can the songs increase your vocabulary?
2. In your opinion, is learning vocabulary with songs on *TikTok* efficient for learning vocabulary?
3. Which is easier to learn vocabulary than learning through English viral songs on *TikTok* or memorizing using a dictionary?
4. Do you think learning Vocabulary through English viral songs needs to be implemented at school?
5. Are there any when learning Vocabulary through English viral songs on the *TikTok* application?

E. Procedure of The Research

The procedure for collecting data in this research is as follows:

1. creation

the first factor the researcher will do is introduce the researcher herself in class and apprehend them nicely. after which the researcher prepares all of the things the researcher wishes to do a questionnaire and interview to design the

step the researcher use. is set what, where, when, and the way the instrumentation will be applied.

2. amassing the facts

At this step, the researcher involves the magnificence and asks students to answer the questionnaire and intervithen collects students' papers one after the other.

3. reading the statistics

After accumulating records from students' answers sheets, the researcher will examine being taken.

four. conclusion

And the closing, the researcher will conclude the information which might be being amassed.

F. Technique of Collecting the Data

In the first stage, the researcher prepares the interview and questionnaire. The interview and questionnaire consist of 20 questions. In the second stage, the researcher will distribute questionnaire sheets to be answered by students, after students answered the questionnaire, the researcher would conduct interviews with students individually. In the next stage, answer all the interview questions based on their experiences.

Previously the researcher had validated the statements in the questionnaire with 3 expert validators, the result validated the item should be improved. Those 3,7,5 items must be corrected using more effective language so students can easily understand how to choose the statements. Then the second validator a negative statement is needed to balance and strengthen the result of students'

answers. Everything is fixed and got validation from all validators. To see all the validation proof, the researcher attached Appendix II.

After that, the researcher will analyze the result of the interview and questionnaires, after which transcript the scholars separately. And the researcher conducted interviews with written interviews so that students are greater unfastened to answer. within the fifth degree, the researcher will locate the end result and describe the scholars' notion in the direction of English track videos TikTok to learn English vocabulary. So the very last level the researcher will make conclusions approximately the students' perception of English songs on TikTok in learning English vocabulary. furthermore, the objects of the questionnaire will translat

G. Technique of Analyzing the Data

After collecting information from the questionnaire and interview, the researcher will examine it, put it right into a table, and summarize it in frequency and percent.

meanwhile, the interview information can be analyzed the usage of the waft model by using Miles and Huberman (1992). The model has some additives to analyze, such as information reduction, display, and conclusion. the primary is statistics discount. It refers to selecting, focusing, and summarizing the uncooked facts from interviews, remark, documents, or other qualitative statistics (Miles et al., 2014).

the second stage is statistics display. in this degree, the researcher will pick out statistics shape of essays, tables, pics, categorizations, and others. The reason of showing the information is to help the researcher understand what

occurs inside the present statistics and take into account what to do subsequent. on this studies, the statistics from the interview will gift in the form of narration. The final is drawing and verifying the conclusion. After displaying the records, the researcher will make conclusions based totally at the studies questions.

furthermore, the 1/3 step in qualitative studies consistent with Mules and Huberman (In Sugiyono, 2012:158) is the conclusion of verification. the realization in preliminary proposals states still transient and will trade if they do not find strong proof that supports the records series of the following one however, if conclusions are discovered at an early stage. Supported with legitimate and steady proof while the researcher returns to the field of information collection, the conclusions are credible. for that reason the conclusions inside the research qualitative research can be able to answer the formulation of the hassle, and problem formula in qualitative research continues to be brief. it will expand after the research is in the area.

The researcher will change the facts into a share formulation to investigate the information from the questionnaire and interviews. according to Sudijono (2011:43):

$$\text{Which are: } P = \frac{F}{N} \times 100\%$$

P = Percentage number

f = Frequency of alternative answers

N = range of samples

From the calculation above formulation the use of generated data in the shape of percent (%), the class score is then converted right into a class in phrases of percentage as the following:

Table 3.3

The Scale of Students' Perception

Level of Mastery	Letter Case	Value	Criterion
76-100	A	4	Excellent
56-75	B	3	Good
41-54	C	2	Fair
Less Than 40	D	1	Poor

(Widoyoko. 2012: 115)
